VOLUME 33, PART II

SUBJECT INDEX

A

Absorption.

The Durability of Cement Mortars; The Cement and Method of Testing Major Variables. C. A. Hughes, 511.

Permeability of Brick Masonry Walls—an Hypothesis. W. C. Voss, 670. Discussion, 688.

Strength, Water Absorption and Weather Resistance of Building Bricks Produced in the United States. J. W. McBurney and C. E. Lovewell, 636.

Accelerated Tests.

Consistent Data Showing the Influence of Water Velocity and Time on the Corrosion of Iron. R. F. Passano and F. R. Nagley, 387. Discussion, 400.

The Durability of Cement Mortars; The Cement and Method of Testing Major Variables. C. A. Hughes, 511.

Strength, Water Absorption and Weather Resistance of Building Bricks Produced in the United States. J. W. McBurney and C. E. Lovewell, 636.

Adsorption.

A Study of Adsorption as a Method for the Determination of the Surface of Pulverized Coal. R. A. Sherman, C. E. Irion and E. J. Rogers, 729. Discussion, 739.

Agglutinating-Value Test.

Agglutinating-Value Test for Coal. W. A. Selvig, B. B. Beattie and J. B. Clelland, 741. Discussion, 758.

Aircraft Engines.

Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 1.

Alloys.

Alloys in Cast Iron, 145, 238.

A Comparison of Certain White-Metal Bearing Alloys, Particularly at Elevated Temperatures. C. E. Swartz and A. J. Phillips, 416. Discussion, 426.

Corrosion Resistance of Structural Aluminum. E. H. Dix, Jr., 405. Discussion, 413.

The Effect of the Addition of Lead on the Hardness of Certain Tin-Base Bearing Alloys at Elevated Temperatures. J. N. Kenyon, 430. Discussion, 445.

The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb). H. B. Gardner and C. M. Saeger, Jr., 448. Discussion, 459.

The Fatigue Properties of Light Metals and Alloys. R. L. Templin, 364. Discussion, 381.

Alloy Steel.

Shearing Properties and Poisson's Ratio of Structural and Alloy Steels. Inge Lyse and H. J. Godfrey, 274. Discussion, 286.

Strength, Water Absorption and Weather Resistance of Building Bricks Produced in the United States. J. W. McBurney and C. E. Lovewell, 636.

Adsorption.

A Study of Adsorption as a Method for the Determination of the Surface of Pulverized Coal. R. A. Sherman, C. E. Irion and E. J. Rogers, 729. Discussion, 739.

Agglutinating-Value Test.

Agglutinating-Value Test for Coal. W. A. Selvig, B. B. Beattie and J. B. Clelland, 741. Discussion, 758.

Aircraft Engines.

Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 1.

Alloys.

Alloys in Cast Iron, 145, 238.

A Comparison of Certain White-Metal Bearing Alloys, Particularly at Elevated Temperatures. C. E. Swartz and A. J. Phillips, 416. Discussion, 426.

Corrosion Resistance of Structural Aluminum. E. H. Dix, Jr., 405. Discussion, 413.

The Effect of the Addition of Lead on the Hardness of Certain Tin-Base Bearing Alloys at Elevated Temperatures. J. N. Kenyon, 430. Discussion, 445.

The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb). H. B. Gardner and C. M. Saeger, Jr., 448. Discussion, 459.

The Fatigue Properties of Light Metals and Alloys. R. L. Templin, 364. Discussion, 381.

Alloy Steel.

Shearing Properties and Poisson's Ratio of Structural and Alloy Steels. Inge Lyse and H. J. Godfrey, 274. Discussion, 286.

Aluminum.
Corrosion Resistance of Structural Aluminum. E. H. Dix, Jr., 405. Discussion, 413.
The Fatigue Properties of Light Metals and Alloys. R. L. Templin, 364. Discussion, 381.

Apparatus.
See **Testing Apparatus.**

Asphalt.
Method and Apparatus for the Recovery of Asphalt. Gene Abson, 704. Discussion, 712.
A Qualitative Test for Determining the Degree of Heterogeneity of Asphalts. G. L. Oliensis, 715. Discussion, 722.

Automobile Engines.
Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 1.
Symposium on Cast Iron, 115.

Automotive Castings.
Symposium on Cast Iron, 147, 152, 155, 158, 209, 213.

B

Babbitt Metal.
A Comparison of Certain White-Metal Bearing Alloys, Particularly at Elevated Temperatures. C. E. Swartz and A. J. Phillips, 416. Discussion, 426.

Bearing Metal.
A Comparison of Certain White-Metal Bearing Alloys, Particularly at Elevated Temperatures. C. E. Swartz and A. J. Phillips, 416. Discussion, 426..
The Effect of the Addition of Lead on the Hardness of Certain Tin-Base Bearing Alloys at Elevated Temperatures. J. N. Kenyon, 430. Discussion, 445.

Bituminous Materials.
Method and Apparatus for the Recovery of Asphalt. Gene Abson, 704. Discussion, 712.

Bond.
Permeability of Brick Masonry Walls—an Hypothesis. W. C. Voss, 670. Discussion, 688.
Tests on Brick Masonry Beams. M. O. Withey, 651. Discussion, 666.

Brass.
The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb). H. B. Gardner and C. M. Saeger, Jr., 448. Discussion, 459.

Brick.
Permeability of Brick Masonry Walls—an Hypothesis. W. C. Voss, 670. Discussion, 688.
Strength, Water Absorption and Weather Resistance of Building Bricks Produced in the United States. J. W. McBurney and C. E. Lovewell, 636.
Tests on Brick Masonry Beams. M. O. Withey, 651. Discussion, 666.

Brinell Hardness.
See **Hardness Testing.**

C

Caking Properties of Coal.
Agglutinating-Value Test for Coal. W. A. Selvig, B. B. Beattie and J. B. Clelland, 741. Discussion, 758.

Calorimeter.
Calorimeter Installation in the Engineering Materials Laboratory of the University of California for Studies of Heat Generation in Mass Concrete. S. B. Biddle, Jr., and J. W. Kelly, 571. Discussion, 589.

Cast Iron.
Symposium on Cast Iron, 115.

Castings.
Symposium on Cast Iron, 115.

Cement.
Calorimeter Installation in the Engineering Materials Laboratory of the University of California for Studies of Heat Generation in Mass Concrete. S. B. Biddle, Jr., and J. W. Kelly, 571. Discussion, 589.
The Durability of Cement Mortars; The Cement and Method of Testing Major Variables. C. A. Hughes, 511.
The Effect of Adding a Siliceous Material to Portland Cements upon Volume Changes, Compressive Strength and Heat Generation. R. W. Carlson and G. E. Troxell, 484. Discussion, 502.
A Rapid Method for the Determination of the Specific Surface of Portland Cement. L. A. Wagner, 553.
Status of Specifications for Hydraulic Cements in the United States. P. H. Bates, 462. Discussion, 476.

Coal.
Agglutinating-Value Test for Coal. W. A. Selvig, B. B. Beattie and J. B. Clelland, 741. Discussion, 758.
A Study of Adsorption as a Method for the Determination of the Surface of Pulverized Coal. R. A. Sherman, C. E. Irion and E. J. Rogers, 729. Discussion, 739.

Coking Properties of Coal.
Agglutinating-Value Test for Coal. W. A. Selvig, B. B. Beattie and J. B. Clelland, 741. Discussion, 758.

Collection of Data.
Planning for the Collection of Standardization Data. J. R. Townsend, 770.

Compression Testing.
The Durability of Cement Mortars; The Cement and Method of Testing Major Variables. C. A. Hughes, 511.
The Effect of Adding a Siliceous Material to Portland Cements upon Volume Changes, Compressive Strength and Heat Generation. R. W. Carlson and G. E. Troxell, 484. Discussion, 502.
The Fatigue Properties of Light Metals and Alloys. R. L. Templin, 364. Discussion, 381.

Strength, Water Absorption and Weather Resistance of Building Bricks Produced in the United States. J. W. McBurney and C. E. Lovewell, 636.
Symposium on Cast Iron, 157, 176, 201.

Concrete.
Apparatus for Fabricating and Testing Mass-Concrete Cylinders. R. F. Blanks and E. N. Vidal, 538.
Calorimeter Installation in the Engineering Materials Laboratory of the University of California for Studies of Heat Generation in Mass Concrete. S. B. Biddle, Jr., and J. W. Kelly, 571. Discussion, 589.
Further Studies of Paving Concrete. F. H. Jackson and W. F. Kellermann, 590. Discussion, 634.

Corrosion.
Consistent Data Showing the Influence of Water Velocity and Time on the Corrosion of Iron. R. F. Passano and F. R. Nagley, 387. Discussion, 400.
Corrosion Resistance of Structural Aluminum. E. H. Dix, Jr., 405. Discussion, 413.
Symposium on Cast Iron, 159, 215.

Creep Tests.
See also **Temperature, Effect of.**
Symposium on Cast Iron, 160, 187.

Crystalline Structure.
Crystalline Structure in Relation to Failure of Metals—Especially by Fatigue. Edgar Marburg Lecture. Herbert John Gough, 3.

D

Data, Analysis of.
See **Statistical Analysis.**

Density.
The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb). H. B. Gardner and C. M. Saeger, Jr., 448. Discussion, 459.

Design.
Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 1.
Symposium on Cast Iron, 120, 164, 206, 258.

Durability of Mortars.
The Durability of Cement Mortars; The Cement and Method of Testing Major Variables. C. A. Hughes, 511.

E

Elasticity.
See also **Tension Testing.**
Symposium on Cast Iron, 158, 180, 199.

Electrical Resistivity.
The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb). H. B. Gardner and C. M. Saeger, Jr., 448. Discussion, 459.

Endurance Testing.
See **Fatigue.**

Extraction, Methods of.
Method and Apparatus for the Recovery of Asphalt. Gene Abson, 704. Discussion, 712.

Exposure Tests.
See **Corrosion; Weathering.**

F

Fabricating Apparatus.
Apparatus for Fabricating and Testing Mass-Concrete Cylinders. R. F. Blanks and E. N. Vidal, 538.

Fatigue.
Crystalline Structure in Relation to Failure of Metals—Especially by Fatigue. Edgar Marburg Lecture. Herbert John Gough, 3.
The Fatigue Properties of Light Metals and Alloys. R. L. Templin, 364. Discussion, 381.
Fatigue Tests of Galvanized Wire Under Pulsating Tensile Stress. S. M. Shelton and W. H. Swanger, 348. Discussion, 361.
An "Overnight" Test for Determining Endurance Limit. H. F. Moore and H. B. Wishart, 334. Discussion, 341.
Symposium on Cast Iron, 158, 177, 198.

Fiber Structure.
Crystalline Structure in Relation to Failure of Metals—Especially by Fatigue. Edgar Marburg Lecture. Herbert John Gough, 3.

Fineness.
See **Mechanical Analysis.**

Finishing, Methods of.
Further Studies of Paving Concrete. F. H. Jackson and W. F. Kellermann, 590. Discussion, 634.

Flexure Testing.
The Fatigue Properties of Light Metals and Alloys. R. L. Templin, 364. Discussion, 381.
Strength, Water Absorption and Weather Resistance of Building Bricks Produced in the United States. J. W. McBurney and C. E. Lovewell, 636.
Symposium on Cast Iron, 157, 170, 239.
Tests on Brick Masonry Beams. M. O. Withey, 651. Discussion, 666.

Freezing-and-Thawing Tests.
The Durability of Cement Mortars; The Cement and Method of Testing Major Variables. C. A. Hughes, 511.
Strength, Water Absorption and Weather Resistance of Building Bricks Produced in the United States. J. W. McBurney and C. E. Lovewell, 636.

G

Galvanizing.
Fatigue Tests of Galvanized Wire Under Pulsating Tensile Stress. S. M. Shelton and W. H. Swanger, 348. Discussion, 361.

Gasoline.
Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 1.

Grain Size.
Crystalline Structure in Relation to Failure of Metals—Especially by Fatigue. Edgar Marburg Lecture. Herbert John Gough, 3.

H

Hardness Testing.
The Effect of the Addition of Lead on the Hardness of Certain Tin-Base Bearing Alloys at Elevated Temperatures. J. N. Kenyon, 430. Discussion, 445.
The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb). H. B. Gardner and C. M. Saeger, Jr., 448. Discussion, 459.
Symposium on Cast Iron, 158, 189, 247, 250.
The Torsion Impact Test. G. V. Luerssen and O. V. Greene, 315. Discussion, 328.

Heat Generation.
Calorimeter Installation in the Engineering Materials Laboratory of the University of California for Studies of Heat Generation in Mass Concrete. S. B. Biddle, Jr., and J. W. Kelly, 571. Discussion, 589.
The Effect of Adding a Siliceous Material to Portland Cements upon Volume Changes, Compressive Strength and Heat Generation. R. W. Carlson and G. E. Troxell, 484. Discussion, 502.

Heterogeneity.
A Qualitative Test for Determining the Degree of Heterogeneity of Asphalts. G. L. Oliensis, 715. Discussion, 722.

High Temperature Testing.
See **Temperature, Effect of.**

I

Immersion Tests.
Consistent Data Showing the Influence of Water Velocity and Time on the Corrosion of Iron. R. F. Passano and F. R. Nagley, 387. Discussion, 400.
The Durability of Cement Mortars; The Cement and Method of Testing Major Variables. C. A. Hughes, 511.

Impact Testing.
Symposium on Cast Iron, 158, 184.
The Torsion Impact Test. G. V. Luerssen and O. V. Greene, 315. Discussion, 328.

Instruments.
See **Testing Apparatus.**

Intercrystalline Boundary.
Crystalline Structure in Relation to Failure of Metals—Especially by Fatigue. Edgar Marburg Lecture. Herbert John Gough, 3.

Iron.
Consistent Data Showing the Influence of Water Velocity and Time on the Corrosion of Iron. R. F. Passano and F. R. Nagley, 387. Discussion, 400.
The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb). H. B. Gardner and C. M. Saeger, Jr., 448. Discussion, 459.
Symposium on Cast Iron, 115.

L

Lead.
The Effect of the Addition of Lead on the Hardness of Certain Tin-Base Bearing Alloys at Elevated Temperatures. J. N. Kenyon, 430. Discussion, 445.

Light Metals.
See **Alloys.**

Lubricants.
Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 1.

M

Machineability.
Symposium on Cast Iron, 159, 209.

Magnesium.
The Fatigue Properties of Light Metals and Alloys. R. L. Templin, 364. Discussion, 381.

Masonry.
See **Brick.**

Mechanical Analysis.
Agglutinating-Value Test for Coal. W. A. Selvig, B. B. Beattie and J. B. Clelland, 741. Discussion, 758.
Factors in the Presentation and Comparison of Particle Size Data. E. J. Dunn, Jr., and John Shaw, 692.

Metallography.
Crystalline Structure in Relation to Failure of Metals—Especially by Fatigue. Edgar Marburg Lecture. Herbert John Gough, 3.

Modulus of Rupture.
See **Flexure Testing.**

Molds.
Apparatus for Fabricating and Testing Mass-Concrete Cylinders. R. F. Blanks and E. N. Vidal, 538.

Mortar.
The Durability of Cement Mortars; The Cement and Method of Testing Major Variables. C. A. Hughes, 511.
The Effect of Adding a Siliceous Material to Portland Cements upon Volume Changes, Compressive Strength and Heat Generation. R. W. Carlson and G. E. Troxell, 484. Discussion, 502.
Permeability of Brick Masonry Walls—an Hypothesis. W. C. Voss, 670. Discussion, 688.

N

New York Regional Meeting.
Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 1.

O

Oils.
Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 1.

Overnight Test.
An "Overnight" Test for Determining Endurance Limit. H. F. Moore and H. B. Wishart, 334. Discussion, 341.

P

Particle Size.
Factors in the Presentation and Comparison of Particle Size Data. E. J. Dunn, Jr., and John Shaw, 692.
A Rapid Method for the Determination of the Specific Surface of Portland Cement. L. A. Wagner, 553.

Paving Materials.
Further Studies of Paving Concrete. F. H. Jackson and W. F. Kellermann, 590. Discussion, 634.

Permeability.
Permeability of Brick Masonry Walls—an Hypothesis. W. C. Voss, 670. Discussion, 688.

Petroleum Products.
Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 1.

Portland Cement.
See **Cement.**

Pouring Temperature.
The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb). H. B. Gardner and C. M. Saeger, Jr., 448. Discussion, 459.

Pour Test.
Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 1.

Presentation of Data.
See **Statistical Analysis.**

R

Radiography.
See also **X-ray.**
Relative Merits of Film and Paper for Industrial X-ray Work. Ancel St. John and H. R. Isenburger, 761.

Reinforced Brick Masonry.
Tests on Brick Masonry Beams. M. O. Withey, 651. Discussion, 666.

Rockwell Hardness.
See **Hardness Testing.**

Rohn Test.
Studies on a Modification of the Rohn Test for Investigating Creep of Metals. C. R. Austin and J. R. Gier, 293. Discussion, 308.

S

Shear Testing.
Shearing Properties and Poisson's Ratio of Structural and Alloy Steels. Inge Lyse and H. J. Godfrey, 274. Discussion, 286.
Symposium on Cast Iron, 158, 177.
Tests on Brick Masonry Beams. M. O. Withey, 651. Discussion, 666.

Siliceous Materials.
The Effect of Adding a Siliceous Material to Portland Cements upon Volume Changes, Compressive Strength and Heat Generation. R. W. Carlson and G. E. Troxell, 484. Discussion, 502.

Slip.
Crystalline Structure in Relation to Failure of Metals—Especially by Fatigue. Edgar Marburg Lecture. Herbert John Gough, 3.

Sodium Sulfate Test.
The Durability of Cement Mortars; The Cement and Method of Testing Major Variables. C. A. Hughes, 511.

Specifications.
Status of Specifications for Hydraulic Cements in the United States. P. H. Bates, 462. Discussion, 476.
Symposium on Cast Iron, 115.

Statistical Analysis.
Consistent Data Showing the Influence of Water Velocity and Time on the Corrosion of Iron. R. F. Passano and F. R. Nagley, 387. Discussion, 400.
Factors in the Presentation and Comparison of Particle Size Data. E. J. Dunn, Jr., and John Shaw, 692.
Planning for the Collection of Standardization Data. J. R. Townsend, 770.
Status of Specifications for Hydraulic Cements in the United States. P. H. Bates, 462. Discussion, 476.

Steel.
Fatigue Tests of Galvanized Wire Under Pulsating Tensile Stress. S. M. Shelton and W. H. Swanger, 348. Discussion, 361.
Shearing Properties and Poisson's Ratio of Structural and Alloy Steels. Inge Lyse and H. J. Godfrey, 274. Discussion, 286.
The Torsion Impact Test. G. V. Luerssen and O. V. Greene, 315. Discussion, 328.

Structural Light Alloys.
Corrosion Resistance of Structural Aluminum. E. H. Dix, Jr., 405. Discussion, 413.

Structural Steel.
Shearing Properties and Poisson's Ratio of Structural and Alloy Steels. Inge Lyse and H. J. Godfrey, 274. Discussion, 286.

Structure of Metals.
Crystalline Structure in Relation to Failure of Metals—Especially by Fatigue. Edgar Marburg Lecture. Herbert John Gough, 3.

Sulfur.

The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb). H. B. Gardner and C. M. Saeger, Jr., 448. Discussion, 459.

Surface Determination.

A Rapid Method for the Determination of the Specific Surface of Portland Cement. L. A. Wagner, 553.

A Study of Adsorption as a Method for the Determination of the Surface of Pulverized Coal. R. A. Sherman, C. E. Irion and E. J. Rogers, 729. Discussion, 739.

T

Temperature, Effect of.

A Comparison of Certain White-Metal Bearing Alloys, Particularly at Elevated Temperatures. C. E. Swartz and A. J. Phillips, 416. Discussion, 426.

The Effect of the Addition of Lead on the Hardness of Certain Tin-Base Bearing Alloys at Elevated Temperatures. J. N. Kenyon, 430. Discussion, 445.

The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb). H. B. Gardner and C. M. Saeger, Jr., 448. Discussion, 459.

Studies on a Modification of the Rohn Test for Investigating Creep of Metals. C. R. Austin and J. R. Gier, 293. Discussion, 308.

Symposium on Cast Iron, 160, 187, 197, 235.

Tension Testing.

The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb). H. B. Gardner and C. M. Saeger, Jr., 448. Discussion, 459.

The Fatigue Properties of Light Metals and Alloys. R. L. Templin, 364. Discussion, 381.

Fatigue Tests of Galvanized Wire Under Pulsating Tensile Stress. S. M. Shelton and W. H. Swanger, 348. Discussion, 361.

An "Overnight" Test for Determining Endurance Limit. H. F. Moore and H. B. Wishart, 334. Discussion, 341.

Shearing Properties and Poisson's Ratio of Structural and Alloy Steels. Inge Lyse and H. J. Godfrey, 274. Discussion, 286.

Symposium on Cast Iron, 159, 169, 197, 239.

Testing Apparatus.

Agglutinating-Value Test for Coal. W. A. Selvig, B. B. Beattie and J. B. Clelland, 741. Discussion, 758.

Apparatus for Fabricating and Testing Mass-Concrete Cylinders. R. F. Blanks and E. N. Vidal, 538.

Calorimeter Installation in the Engineering Materials Laboratory of the University of California for Studies of Heat Generation in Mass Concrete. S. B. Biddle, Jr., and J. W. Kelly, 571. Discussion, 589.

Consistent Data Showing the Influence of Water Velocity and Time on the Corrosion of Iron. R. F. Passano and F. R. Nagley, 387. Discussion, 400.

The Fatigue Properties of Light Metals and Alloys. R. L. Templin, 364. Discussion, 381.

Method and Apparatus for the Recovery of Asphalt. Gene Abson, 704. Discussion, 712.

A Rapid Method for the Determination of the Specific Surface of Portland Cement. L. A. Wagner, 553.

Shearing Properties and Poisson's Ratio of Structural and Alloy Steels. Inge Lyse and H. J. Godfrey, 274. Discussion, 286.

Studies on a Modification of the Rohn Test for Investigating Creep of Metals. C. R. Austin and J. R. Gier, 293. Discussion, 308.
The Torsion Impact Test. G. V. Luerssen and O. V. Greene, 315. Discussion, 328.

Testing, Methods of.
Agglutinating-Value Test for Coal. W. A. Selvig, B. B. Beattie and J. B. Clelland, 741. Discussion, 758.
Apparatus for Fabricating and Testing Mass-Concrete Cylinders. R. F. Blanks and E. N. Vidal, 538.
Crystalline Structure in Relation to Failure of Metals—Especially by Fatigue. Edgar Marburg Lecture. Herbert John Gough, 3.
The Fatigue Properties of Light Metals and Alloys. R. L. Templin, 364. Discussion, 381.
Further Studies of Paving Concrete. F. H. Jackson and W. F. Kellermann, 590. Discussion, 634.
Method and Apparatus for the Recovery of Asphalt. Gene Abson, 704. Discussion, 712.
An "Overnight" Test for Determining Endurance Limit. H. F. Moore and H. B. Wishart, 334. Discussion, 341.
A Qualitative Test for Determining the Degree of Heterogeneity of Asphalts. G. L. Oliensis, 715. Discussion, 722.
A Rapid Method for the Determination of the Specific Surface of Portland Cement. L. A. Wagner, 553.
Relative Merits of Film and Paper for Industrial X-ray Work. Ancel St. John and H. R. Isenburger, 761.
Shearing Properties and Poisson's Ratio of Structural and Alloy Steels. Inge Lyse and H. J. Godfrey, 274. Discussion, 286.
Studies on a Modification of the Rohn Test for Investigating Creep of Metals. C. R. Austin and J. R. Gier, 293. Discussion, 308.
A Study of Adsorption as a Method for the Determination of the Surface of Pulverized Coal. R. A. Sherman, C. E. Irion and E. J. Rogers, 729. Discussion, 739.
Tests on Brick Masonry Beams. M. O. Withey, 651. Discussion, 666.
The Torsion Impact Test. G. V. Luerssen and O. V. Greene, 315. Discussion, 328.

Test Specimen.
Fatigue Tests of Galvanized Wire Under Pulsating Tensile Stress. S. M. Shelton and W. H. Swanger, 348. Discussion, 361.
Shearing Properties and Poisson's Ratio of Structural and Alloy Steels. Inge Lyse and H. J. Godfrey, 274. Discussion, 286.

Torsion Testing.
The Torsion Impact Test. G. V. Luerssen and O. V. Greene, 315. Discussion, 328.

Turbidimeter.
A Rapid Method for the Determination of the Specific Surface of Portland Cement. L. A. Wagner, 553.

V

Viscosity.
Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 1.

Volume Change.
See also **Temperature, Effect of.**
Calorimeter Installation in the Engineering Materials Laboratory of the University of California for Studies of Heat Generation in Mass Concrete. S. B. Biddle, Jr., and J. W. Kelly, 571. Discussion, 589.
The Effect of Adding a Siliceous Material to Portland Cements upon Volume Changes, Compressive Strength and Heat Generation. R. W. Carlson and G. E. Troxell, 484. Discussion, 502.

W

Walls.
Permeability of Brick Masonry Walls—an Hypothesis. W. C. Voss, 670. Discussion, 688.

Water.
See **Absorption.**

Water Velocity.
Consistent Data Showing the Influence of Water Velocity and Time on the Corrosion of Iron. R. F. Passano and F. R. Nagley, 387. Discussion, 400.

Wear Testing.
Symposium on Cast Iron, 214.

Weathering.
The Durability of Cement Mortars; The Cement and Method of Testing Major Variables. C. A. Hughes, 511.
Strength, Water Absorption and Weather Resistance of Building Bricks Produced in the United States. J. W. McBurney and C. E. Lovewell, 636.

Welding.
Symposium on Cast Iron, 252.

White Metals.
A Comparison of Certain White-Metal Bearing Alloys, Particularly at Elevated Temperatures. C. E. Swartz and A. J. Phillips, 416. Discussion, 426.

Wire.
The Fatigue Properties of Light Metals and Alloys. R. L. Templin, 364. Discussion, 381.
Fatigue Tests of Galvanized Wire Under Pulsating Tensile Stress. S. M. Shelton and W. H. Swanger, 348. Discussion, 361.

Workability.
Further Studies of Paving Concrete. F. H. Jackson and W. F. Kellermann, 590. Discussion, 634.

X

X-ray.
Relative Merits of Film and Paper for Industrial X-ray Work. Ancel St. John and H. R. Isenburger, 761.

Y

Yield Strength.
See **Tension Testing.**

AUTHOR INDEX

A

Abson, Gene.
Method and Apparatus for the Recovery of Asphalt, 704.
Discussion, 712, 714.

Ambler, H. A.
Discussion, 479.

Anderegg, F. O.
Discussion, 503, 505, 666, 689.

Austin, C. R.
Studies on a Modification of the Rohn Test for Investigating Creep of Metals, 293.
Discussion, 308, 309, 310, 311, 312, 314.

B

Baskin, C. M.
Discussion, 727.

Bates, P. H.
Status of Specifications for Hydraulic Cements in the United States, 462.
Discussion, 502.

Baylis, J. R.
Discussion, 402.

Beattie, B. B.
Agglutinating-Value Test for Coal, 741.

Biddle, S. B., Jr.
Calorimeter Installation in the Engineering Materials Laboratory of the University of California for Studies of Heat Generation in Mass Concrete, 571.

Blanks, R. F.
Apparatus for Fabricating and Testing Mass-Concrete Cylinders, 538.

Blomstrom, L. C.
Discussion, 427.

Bornstein, H.
Preface to Symposium on Cast Iron, 115.

C

Carlson, R. W.
The Effect of Adding a Siliceous Material to Portland Cements upon Volume Changes, Compressive Strength and Heat Generation, 484.
Discussion, 509.

Clark, C. L.
Discussion, 309.

Clayden, A. L.
Factors in Engine Design Which Affect Oil Performance. Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 2.

Clelland, J. B.
Agglutinating-Value Test for Coal, 741.
Conrow, A. D.
Discussion, 634.

D

Darby, E. R.
Discussion, 427.
Davis, A. L.
Discussion, 330.
Davis, R. E.
Discussion, 481, 506, 691.
de Forest, A. V.
Discussion, 330, 343, 383.
Derleth, C. P.
Discussion, 506.
Dietrich, M. A.
Service Changes in Crankcase Lubricating Oils. Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 2.
Dix, E. H., Jr.
Discussion, 344, 415.
Corrosion Resistance of Structural Aluminum, 405.
Dow, A. W.
Discussion, 713.
Dunn, E. J., Jr.
Factors in the Presentation and Comparison of Particle Size Data, 692.
Dwyer, J. R.
Discussion, 691.

E

Eaton, G. M.
Discussion, 308.
Evans, U. R.
Discussion, 400.

F

Fieldner, A. C.
Discussion, 758, 760.
Filippi, Hugo.
Discussion, 667.
Folsom, R. G.
Discussion, 589.

G

Gann, J. A.
Discussion, 381.
Gardner, G. O.
Discussion, 476.
Gardner, H. B.
The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb), 448.
Discussion, 460.
Gier, J. R.
Studies on a Modification of the Rohn Test for Investigating Creep of Metals, 293.

Gillett, H. W.
Discussion, 309, 310, 311, 312, 428.
Godfrey, H. J.
Shearing Properties and Poisson's Ratio of Structural and Alloy Steels, 274.
Discussion 286, 291.
Gough, Herbert John.
Crystalline Structure in Relation to Failure of Metals—Especially by Fatigue: Edgar Marburg Lecture, 3.
Discussion, 310, 312, 344, 361, 384.
Graves, W. H.
Oil Consumption in Motor Car Engines. Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 2.
Greene, O. V.
The Torsion Impact Test, 315.
Discussion, 332.
Greenman, R. S.
Discussion, 481, 504.
Groesbeck, E. C.
Discussion, 401.
Gruse, W. A.
Carbon Deposits in Gasoline Engines. Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 2.

H

Hanna, W. C.
Discussion, 503.
Harder, O. E.
Discussion, 459.
Herschman, H. K.
Discussion, 426, 445.
Hughes, C. A.
The Durability of Cement Mortars; The Cement and Method of Testing Major Variables, 511.
Hurtgen, Archibald.
Discussion, 330.

I

Irion, C. E.
A Study of Adsorption as a Method for the Determination of the Surface of Pulverized Coal, 729.
Isenberg, N.
Discussion, 759.
Isenburger, H. R.
Relative Merits of Film and Paper for Industrial X-ray Work, 761.

J

Jackson, F. H.
Further Studies of Paving Concrete, 590.
Discussion, 634, 635.
Jasper, T. McL.
Discussion, 287, 343.

K

Kellermann, W. F.
Further Studies of Paving Concrete, 590.
Kelly, J. W.
Calorimeter Installation in the Engineering Materials Laboratory of the University of California for Studies of Heat Generation in Mass Concrete, 571.
Kenyon, J. N.
The Effect of the Addition of Lead on the Hardness of Certain Tin-Base Bearing Alloys at Elevated Temperatures, 430.
Discussion, 445.
Kommers, J. B.
Discussion, 341.
Krauss, E. E.
Discussion, 668.

L

Lang, F. C.
Discussion, 634.
Lathe, F. E.
Discussion, 758, 759.
Law, L. M.
Discussion, 726.
Lovewell, C. E.
Strength, Water Absorption and Weather Resistance of Building Bricks Produced in the United States, 636.
Lowry, H. H.
Discussion, 739.
Luerssen, G. V.
The Torsion Impact Test, 315.
Discussion, 332.
Lyse, Inge.
Shearing Properties and Poisson's Ratio of Structural and Alloy Steels, 274.
Discussion, 291.

M

MacGregor, C. W.
Discussion, 289.
Malleis, O. O.
Discussion, 758.
Matthews, I. C.
Discussion, 403.
McBurney, J. W.
Strength, Water Absorption and Weather Resistance of Building Bricks Produced in the United States, 636.
Discussion, 688.
McCloud, J. L.
Present Concepts of the Relation of A.S.T.M. Pour Test to Service Requirements of Oils. Summary of Proceedings of the New York Regional Meeting —Symposium on Motor Lubricants, 2.

Merriman, Thaddeus.
Discussion, 478.
Miesenhelder, P. D.
Discussion, 635.
Miller, J. S., Jr.
Discussion, 713.
Moore, H. F.
An "Overnight" Test for Determining Endurance Limit, 334.
Discussion, 286, 346, 363.
Mutchler, W. H.
Discussion, 414.

N

Nadai, A.
Discussion, 287.
Nagley, F. R.
Consistent Data Showing the Influence of Water Velocity and Time on the Corrosion of Iron, 387.
Nicholson, V.
Discussion, 722.
Nutt, Arthur.
Aircraft Engine Lubrication. Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 2.

O

Oliensis, G. L.
A Qualitative Test for Determining the Degree of Heterogeneity of Asphalts, 715.
Discussion, 728.

P

Passano, R. F.
Consistent Data Showing the Influence of Water Velocity and Time on the Corrosion of Iron, 387.
Discussion, 402, 403.
Parsons, D. E.
Discussion, 666.
Paul, Ira.
Discussion, 477.
Pearson, J. C.
Discussion, 480, 506.
Peterson, R. E.
Discussion, 342.
Phillips, A. J.
A Comparison of Certain White-Metal Bearing Alloys, Particularly at Elevated Temperatures, 416.
Powers, T. C.
Discussion, 505, 634.

R

Rawdon, H. S.
Discussion, 329, 414.
Rogers, E. J.
A Study of Adsorption as a Method for the Determination of the Surface of Pulverized Coal, 729.
Roller, P. S.
Discussion, 739.

S

Saeger, C. M., Jr.
The Effect of Sulfur and Iron on the Physical Properties of Cast Red Brass (85 Cu, 5 Sn, 5 Zn, 5 Pb), 448.
St. John, Ancel.
Relative Merits of Film and Paper for Industrial X-ray Work, 761.
Scholer, C. H.
Discussion, 506.
Scott, Howard.
Discussion, 328.
Seely, F. B.
Discussion, 286.
Selvig, W. A.
Agglutinating-Value Test for Coal, 741.
Discussion, 759, 760.
Shaw, John.
Factors in the Presentation and Comparison of Particle Size Data, 692.
Shelton, S. M.
Fatigue Tests of Galvanized Wire Under Pulsating Tensile Stress, 348.
Sherman, R. A.
A Study of Adsorption as a Method for the Determination of the Surface of Pulverized Coal, 729.
Discussion, 740.
Speller, F. N.
Discussion, 415.
Stenzel, R. W.
Discussion, 589.
Styri, Haakon.
Discussion, 329.
Swanger, W. H.
Fatigue Tests of Galvanized Wire Under Pulasting Tensile Stress, 348.
Discussion, 363, 426.
Swartz, C. E.
A Comparison of Certain White-Metal Bearing Alloys, Particularly at Elevated Temperatures, 416.
Discussion, 429.
Swayze, M. A.
Discussion, 504.

T

Talbot, A. N.
Discussion, 635.
Templin, R. L.
The Fatigue Properties of Light Metals and Alloys, 364.
Discussion, 342, 361, 385.
Thum, E. E.
Discussion, 313, 345.
Tour, Sam.
Discussion, 428.
Townsend, J. R.
Planning for the Collection of Standardization Data, 770.
Discussion, 385.
Troxell, G. E.
The Effect of Adding a Siliceous Material to Portland Cements upon Volume Changes, Compressive Strength and Heat Generation, 484.
Discussion, 509.
Tuckerman, L. B.
Discussion, 381, 413.

U

Ulman, M. H.
Discussion, 482, 712, 713.
Upham, E. W.
Viscosity of Automobile Crankcase Oils as Related to Service Requirements. Summary of Proceedings of the New York Regional Meeting—Symposium on Motor Lubricants, 2.

V

Vidal, E. N.
Apparatus for Fabricating and Testing Mass-Concrete Cylinders, 538.
Voss, W. C.
Permeability of Brick Masonry Walls—An Hypothesis, 670.
Discussion, 669, 688, 691.

W

Wagner, L. A.
A Rapid Method for the Determination of the Specific Surface of Portland Cement, 553.
Waldron, L. J.
Discussion, 401.
Walter, L. W.
Discussion, 480.
Wishart, H. B.
An "Overnight" Test for Determining Endurance Limit, 334.
Withey, M. O.
Tests on Brick Masonry Beams, 651.
Discussion, 668, 669.
Woods, Hubert.
Discussion, 482.
Woodworth, P. M.
Discussion, 669.
